PROFILE

Full-stack web developer delivering end-to-end web products: pixel-perfect, accessible front-ends with rich motion and interactive 3D (Three.js), plus secure, well-modeled back-ends, REST APIs, and database design. Bilingual English / Arabic interfaces including full RTL. Every project engineered from scratch — design system, code, database, deployment — with security hardening, accessibility and Lighthouse-100 performance as defaults, not extras.

CORE STACK

FRONT-END

- HTML5 · CSS3 · JS (ES6+)
- TypeScript
- React.js · Next.js 14 / 15
- Astro
- Tailwind CSS
- Three.js · GSAP · WebGL
- Responsive · RTL · i18n
- PWA · WCAG 2.1 AA

BACK-END

- Node.js · Express.js
- RESTful API design
- Auth · sessions
- Input validation (Zod)
- Prisma ORM
- Supabase
- FastAPI (Python)
- Security hardening (CSP)

DATA & TOOLS

- SQL — PostgreSQL · MySQL
- MongoDB · SQLite
- Git & GitHub Actions
- Vitest · Playwright
- Vercel · GitHub Pages
- npm workspaces monorepo
- Technical SEO
- Performance audit

EXPERIENCE

Freelance Full-Stack Web Developer — Self-Employed

2022 — present · remote

- 50+ production builds delivered for 30+ clients — marketing sites, e-commerce storefronts, admin dashboards and interactive 3D web experiences.
- Own every layer personally: visual design and design systems, front-end implementation, REST APIs, database modeling, CI and deployment.
- Hardened by default: strict CSP, secure auth and session patterns, schema-guarded inputs (Zod), WCAG 2.1 AA, Core-Web-Vitals tuning.
- Bilingual delivery (EN / AR) incl. full RTL layouts, i18n and multi-currency flows for commerce platforms.

SELECTED PROJECTS

- **Oyster & Co. — luxury watch e-commerce platform** — production
  Next.js 15 · React 19 · Prisma · Three.js · GSAP
  Full storefront with admin panel for orders and bookings, email + exchange-rate integrations.
- **Modern Dashboard & E-Commerce App** — LIVE — azure-theta-87.vercel.app
  React · Node.js · REST API · Tailwind · Vercel
  High-performance interactive web application with dashboard UI and full responsiveness.
- **OK Store — tech & hardware e-commerce** — in development
  Next.js · TypeScript · npm workspaces · Vitest
  Design system, faceted catalog, product pages and a pure hardware-compatibility engine.
- **Carpentry & Decor — client business site** — LIVE — ok-web-blue.vercel.app
  JavaScript · Express.js · Full-stack
  Commercial site: portfolio, service inquiries and a lead-to-booking conversion flow.
- **AMIER Cars — private-collection 3D showroom** — 3D web
  Three.js · Vanilla JS
  Seven vehicles in fully interactive 3D (engine bays, cabins, paint) — bilingual EN/AR.
- **GRIDO1 — premium F1 driver platform** — front-end craft
  Astro · TypeScript · i18n EN/AR
  Data-driven driver pages with a 3D hero scene, RTL support and generated sitemap.

LANGUAGE — Arabic (native) · English (professional working proficiency)
